

“Helping
farm families **feed** their friends & neighbors
at home & around **the world.”**

It is essential, for the short and long term health and prosperity of our community and country, that farmers are able to produce feed and food.

As a supplier of seed to farmers, we are committed to preserving our ability to be their source of this first essential input needed for producing a crop.

With this in mind, we are restricting visitor access into our facilities, so our doors are currently locked.

Please call one of the following numbers and we'll make arrangements to address your needs.

For vegetable seed, call

800-700-1199

For corn and soybeans and other forage seeds, call

877-591-7333

For all other needs, call

419-337-1841

We are continuing to deliver seed and are taking steps to minimize physical contact. Customers can place orders and make arrangements for the pickup of seed by contacting our office. We have adopted a “drive thru” type of service for customers who are picking up seed, which will require an appointment.
