**Test Comments:** Plot benefitted from early planting and germination before an extended wet period set in. Plant stand was good, plant height was not tall which helped provide good standability. There were no serious foliar diseases evident. This is an irrigated site with a pretty light soil texture with some stones, typical for the area.

Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
