**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.75; non-GMO = \$3.75

**Test Comments:** Emerged well and enjoyed good early development. Very little rainfall and warm temperatures in June and through pollination capped yield potential despite good rain and lower temps the rest of the season. Foliar disease pressure was relatively high with anthracnose most evident. Plot received solid dairy manure at 3 tons/acre. One replication removed due to unexplained yield variability.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
